Investment Strategy

The Seahawk Equity Long Short Fund is a global long/short equity fund. The Fund's objective is to achieve superior absolute risk-adjusted returns over the long term. Focusing on energy and transportation sectors and other related industries Seahawk employs a fundamental approach to seek out individual long and short opportunities. The fund invests in equities as well as secured and unsecured fixed income instruments opportunistically. The fund aims at long term capital appreciation with a strong focus on risk management.

Footnotes

(1) The performance-related remuneration is based on the past financial year. The key fund data is determined on the basis of daily information.

No fund data is determined for funds launched less than one year ago.

(2) Past performance is not a reliable indicator of future trends. Performance is determined using the BVI method (without taking front-end loads into consideration). With an investment amount of EUR 10,000 over a five-year investment period and a 5% front-end load, the front-end load amounting to EUR 500 and any additional custodian fees incurred would be deducted from the investment result during the first year. Any individual custodian costs incurred may be deducted from the investment result over subsequent years. Performance is determined using the BVI method. The fund performance in line with the BVI method is the percentage change in the unit value between the beginning and the end of the calculation period. The BVI fund category is derived from the fine categorisation of the BVI.

(3) The top 5 holdings are understood to have taken derivatives into account. All information on the asset-class shares (large cap, medium cap and small cap) relates to the Fund's assets. All information on the asset-class fixed income relates to the Fund's assets.

(4) Risk information: On account of its composition/the techniques used by fund management, the investment fund shows an increased level of volatility. This means that the unit prices may fluctuate significantly upwards or downwards within short time periods.

Under normal market conditions, the key performance data and risk-adjusted performance data refer to a period covering the past three years. With funds launched between one and three years ago, the key data refers to the period since the fund's launch.

The Seahawk Equity Long Short Fund is an actively managed fund which is not managed in reference to any benchmark.

Volatility: Volatility normally means the fluctuation risk of, for instance, a fund. The standard deviation of the performance figures over the period under consideration serves as the mathematical basis; when annualised, this is described as volatility. Volatility of 5% with an average annual performance of 7% means that the next annual performance will (with a 68.27% probability rate) probably be between 2% (=7%-5%) and 12% (=7%+5%).

Sharpe ratio: The Sharpe ratio is the difference between the performance achieved per annum and the risk-free interest rate (Deutsche Bank USD 1 M LIBOR TR Index), divided by the volatility. Therefore, it can be interpreted as the risk premium per unit measured against the overall risk entered into. As a general rule, the higher it is, the better (high performance with a low risk). Owing to their relative size, Sharpe ratios of various portfolios can be compared with one another.

Disclaimer Seahawk Equity Long Short Fund

This document is a customer information ("CI") within the meaning of the German Securities Trading Act (WpHG), the "CI" is directed exclusively to professional clients within the meaning of section 67 WpHG (natural and juristic persons) with habitual residence or registered office in Germany and is used solely for informational purposes.

This "CI" cannot replace an individual investment- and investor-friendly advice and does not justify a contract or any other obligation. Furthermore, the contents do not constitute investment advice, an individual investment recommendation, an invitation to subscribe for securities or a declaration of intent or a request to conclude a contract for a transaction in financial instruments.
